

SUMMER 2016 | INTERNSHIP PROGRAM

COLLIBRA UNIVERSITY ASSOCIATE PROGRAM

Collibra offers an exciting opportunity for current students looking to learn more about Data Governance. University and special high school students may complete a project for credit, taking the form of a bachelor’s or mater’s thesis, a PhD dissertation, or even as part of a course assignment.

Collibra University Associates get access to Collibra’s knowledge resources and software products. Furthermore, Associates are assigned a mentor who supervises their project or work.

Collibra University Associate appointments vary project by project. They span from months for smaller assignments as part of a course, up to a year or more for in-depth studies such as master’s theses or PhD dissertations.

About Collibra
 Collibra is the only company to deliver a global data governance platform that provides data stewardship, data governance and data management for the enterprise business user. Our Data Governance Center platform combined with Collibra Connect leverages our expertise in artificial intelligence and machine learning.
 Founded in 2008, Collibra has locations in New York, London, Paris, Brussels and Wroclaw.
 For more information visit www.collibra.com

COLLIBRA ASSOCIATE
 All the senior members and founders have been really helpful and open to helping us learn. We are encouraged to build our expertise in Collibra products as well as develop and explore our ideas in data governance.

HOW IT WORKS

The project or working period usually has three phases:

- Exploration and Choosing a Topic
- Design and Implementation
- Presentation and Evaluation

Skills Required

Basic programming skills, tech savviness, analytical thinking, presentation skills, and team player.

How to Apply

Submit your application by sending an email to contact@collibra.com with the subject "Collibra University Associate Program." Attach your resume and a short cover letter stating your interests.

Credits and Remuneration

With an agreement from their educational institution, students will be rewarded with credits they can use toward their program of study. If the student demonstrates work of exceptional quality, Collibra may reward the student with a temporary working contract.

Exploration & Choosing a Topic	
Week 1	<ul style="list-style-type: none"> • Introduction call after application screening. • Account is set up to access Compass.
Weeks 1 - 2	<ul style="list-style-type: none"> • Associate explores documentation and course materials.
Weeks 1 - 4	<ul style="list-style-type: none"> • Finalize courses to be completed before internship starts. • Associate completes selected courses. • Finalize project definition together with the mentor.
Design and Implementation (<i>Internship Starts</i>)	
Internship can be from 3 months to over a year	<ul style="list-style-type: none"> • Gets LDAP account through which resources like Box, University, and Compass unlock for the associate. • Associate explores more about the software/platform. • Introduced to software and tools used within Collibra. • Associate can interview employees in different departments to better understand the company and Data Governance and to find new opportunities. • Starts working on the assigned project.
Presentation and Evaluation	
One week before the end date of Internship	<ul style="list-style-type: none"> • Project submission/employment discussion.
Internship Ends
